"An enriching and poetic tribute to manual labour."—Karl Ove Knausgaard Making Things Right is the simple yet captivating story of

a loft renovation, from the moment master carpenter and contractor Ole Thorstensen submits an estimate for the job to when the space is ready for occupation. As the project unfolds, we see the construction through Ole's eyes: the meticulous detail, the pesky splinters, the problem solving, patience, and teamwork required for its completion. Yet Ole's narrative encompasses more than just the fine mechanics of his craft. His labor and passion drive him toward deeper reflections on the nature of work, the academy versus the trades, identity, and life itself. Rich with descriptions of carpentry and process, Making Things

Right is a warm and humorous portrayal of a tightknit working community, a story about the blood, sweat, and frustration involved in doing a job well and the joys in seeing a vision take shape. Includes step-by-step demonstrations on how to carve roosters, herons, pheasants, roadrunners, flowers, trees and letter openers from ordinary twigs and branches using only a pocketknife. Also included are tips for correcting mistakes and some painting and finishing tips. A knife and a little know-how are all you need to turn a twig into a bird, tree, or flower. Perfect for beginning and experienced whittlers. This exceptionally

produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! "In today's ego-techno-centred world, Robert Somerville's... 'Barn Club' approach is a way forward that utilizes local traditions, local materials and local hands to create a built environment that is more harmonious with the natural world and of course more

beautiful."—Jack A. Sobon, architect, timber framer, and author of *Hand Hewn* Natural history meets traditional hand craft in this celebration of the elm tree and community spirit. Perfect for fans of *Norwegian Wood* and *The Hidden Life of Trees* Barn Club calls on us to discover our landscapes more intimately and to explore the joys of making beautiful things by hand, together. When renowned craftsman Robert Somerville moved to Hertfordshire, in southern England, he discovered an unexpected landscape rich with wildlife and elm trees. Nestled within London's commuter belt, this wooded farmland inspired Somerville, a lifelong

woodworker, to revive the ancient tradition of hand-raising barns. Barn Club follows the building of Carley Barn, over the course of one year. Volunteers from all walks of life joined Barn Club, inspired to learn this ancient skill of building elm barns by hand, at its own quiet pace and in the company of others, while using timber from the local woods. The tale of the elm tree in its landscape is central to Barn Club. Its natural history, historic importance, and remarkable survival make for a fascinating story. This is a tale of forgotten trees, a local landscape, and an ancient craft. This book features 16 pages of color photographs,

and black and white line drawings of techniques and traditional timber frame barns feature throughout.
