The firm manages these aspects by legal tools and practices in the context of all commercial transactions. The second volume discussed investments. As voluntary contracts belong to the most important legal tools available to the firm, the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations. This volume discusses funding transactions, exit, and a particular category of decisions raising existential questions (business acquisitions). Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding. Although the perspective chosen in this volume is that of a firm raising funding, this volume will simultaneously provide information about the legal aspects of many investment transactions. 1.2 Funding, Exit, Acquisitions Funding transactions are obviously an important way to manage cash flow. All investments will have to be funded in some way or another. The firm's funding mix will also influence risk in many ways. Funding. The most important way to raise funding is through retained profits and by using existing assets more efficiently. The firm can also borrow money from a bank, or issue debt, equity, or mezzanine securities to a small group of investors.

Valuation Oct 13 2019 Praise for Valuation for Mergers, Buyouts, and Restructuring "Enrique Arzac has provided an excellent analytical framework for the LBO business."--William T. Comfort, Chairman, Citigroup Venture Capital "Enrique Arzac has created a masterpiece--his work combines the theoretical with the practical. He has created an invaluable reference guide that is thoughtful, complete and very user friendly. He provides insight into the theory behind core valuation, LBO's, and options pricing, which creates the foundation for mergers, buyouts and restructuring. In addition to the theoretical, he provides practical insight into deal structuring and deal dynamics. His work should be standard material for all incoming associates."--James P. McVeigh, Managing Director, Corporate & Investment Banking, Banc of America Securities "This first-rate book of applied financial theory provides the tools for financial institutions and capital market participants seeking a methodology for comparing, contrasting, and evaluating investment opportunities and options. By incorporating over 30 years of research, teaching, and practical experience, Professor Arzac has created a text that is not only timely, but timeless in its usefulness to anyone interested in learning the applications of financial theory for the best and most useful allocation of the scarcest economic resource in the world--capital."--William W. Priest, Co-Managing Partner, Steinberg, Priest and Sloane Capital Management and Former Chairman and CEO of Credit Suisse Asset Management "There are two important aspects in graduate business education. The first is acquiring a thorough understanding of the theories of modern finance and the second is acquiring an appreciation for how these theories can be applied to important decisions. Enrique Arzac has taken on this task and made it a successful venture for readers of this book. Unlike other texts on valuation, he explains the reasons for the process and sequence that he recommends rather than just providing the ingredients and the recipe without explanation. This is a welcome addition to the literature in applied corporate finance."--Joel M. Stern, Managing Partner, Stern, Stewart & Co.

It has provided students with a comprehensive, yet concise treatment of the legal issues of fundamental importance to business students and the business profession. Evaluating Corporate Training: Models and Issues Jan 08 2022 We are glad to have the opportunity to work together again in the planning and preparation of this edited volume on the evaluation of corporate training. Our respective professional careers have provided us with experience in this area, both as practitioners and as academicians. It is from both of these perspectives that we approached the preparation of this volume. Our purpose is to provide training professionals in business and industry, and students of human resources development with an overview of current models and issues in educational evaluation. The book is organized around three themes: context, models, and issues. The chapters in the context section are intended to provide the reader with an understanding of the social, organizational, and interpersonal factors that provide background and give meaning to evaluation practice. The models section brings together contributions from some of the most influential thinkers and practitioners in the field. The chapters in this section provide perspective on the dominant themes and emergent trends from individuals who have been, and continue to be, the drivers of those trends. Contributions to the issues section highlight some pervasive themes as well as illuminate new areas of concern and interest that will affect how we assess learning interventions in the organizations of today and tomorrow.

Firm-level Survey Provides Data on Asia's Corporate Crisis and Recovery Apr 11 2022 January 2001 This rich new database on 4,000 Asian firms--operating in Indonesia, the Republic of Korea, Malaysia, the Philippines, and Thailand--focuses on the impact of Asia's economic crisis and on the longer-run determinants of productivity, employment practices, and financial structure. Researchers have decried the limited supply of objective, comparable firm-level data from developing countries. Hallward-Driemeier describes a new database that helps fill this information gap. The database has detailed records on 4,000 firms operating in Indonesia, the Republic of Korea, Malaysia, the Philippines, and Thailand. A comparable survey instrument and sampling methodology was used in each country, and all five studies were carried out simultaneously. The data cover three years (1996-98), allowing for measurements of firm performance before and immediately after the East Asian financial crisis. The questionnaire focused on measuring the impact of the regional financial crisis at the microeconomic level and understanding the longer-run determinants of productivity, employment practices, and financial structure. This database--the first step in the important Firm Analysis and Competitiveness Surveys initiative that the World Bank is spearheading--will be joined by additional country databases. The aim is to fill the gap in much-needed microeconomic evidence using comparable instruments. This paper--a product of Macroeconomics and Growth, Development Research Group--is part of a larger effort in the group to collect comparable firm-level information from developing countries. The research was funded by the Bank's Research Support Budget under the research project "Impact of the East Asian Crisis" (RPO 632-28). The author may be contacted at mhallward@worldbank.org.

Competitive Advantage Apr 18 2020 Now beyond its eleventh printing and translated into twelve languages, Michael Porter's The Competitive Advantage of Nations has changed completely our conception of how prosperity is created and sustained in the modern global economy. Porter's groundbreaking study of international competitiveness has shaped national policy in countries around the world. It has also transformed thinking and action in states, cities, companies, and even entire regions such as Central America. Based on research in ten leading trading nations, The Competitive Advantage of Nations offers the first theory of competitiveness based on the causes of the productivity with which companies compete. Porter shows how traditional comparative advantages such as natural resources and pools of labor have been superseded as sources of prosperity, and how broad macroeconomic accounts of competitiveness are insufficient. The book introduces Porter's "diamond," a whole new way to understand the competitive position of a nation (or other locations) in global competition that is now an integral part of international business thinking. Porter's concept of "clusters," or groups of interconnected firms, suppliers, related industries, and institutions that arise in particular locations, has become a new way for companies and governments to think about economies, assess the competitive advantage of locations, and set public policy. Even before publication of the book, Porter's theory had guided national reassessments in New Zealand and elsewhere. His ideas and personal involvement have shaped strategy in countries as diverse as the Netherlands, Portugal, Taiwan, Costa Rica, and India, and regions such as Massachusetts, California, and the Basque country. Hundreds of cluster initiatives have flourished throughout the world. In an era of intensifying global competition, this pathbreaking book on the new wealth of nations has become the standard by which all future work must be measured.

Global Corporate Governance Jun 01 2021 Effective corporate governance, or the set of controls and incentives that drive top management, originates both outside and inside the firm and assures investors who hope to commit their capital. Essential when buying stocks in one's own country, effective corporate governance is even more important abroad, where information can be less reliable and investor influence (or protection) more limited. In this collection of articles from the Journal of Applied Corporate Finance, more than thirty leading scholars and practitioners discuss the possibilities and limitations of global corporate finance and governance systems, whether in Europe and North America or in the emerging markets of Israel, India, Korea, and South Africa. Essays discuss the political roots of American corporate finance; the structural and financial variations between international corporations; control premiums and the effectiveness of corporate governance systems; debt, folklore, and cross-country differences in financial structures; the driving forces behind the East Asian Financial Crisis of 1997; corporate ownership and control in India, Germany, France, and the United Kingdom; financial and economic lessons of Italy's privatization program; changes in Korean corporate governance; sovereign wealth funds; and the new organization of Canadian business trusts. A special roundtable discussion addresses shareholder activism in the U.K.

Accountability, International Business Operations and the Law Jun 13 2022 A consensus has emerged that corporations have societal and environmental responsibilities when operating transnationally. However, how exactly corporations can be held legally accountable for their transgressions, if at all, is less clear. This volume inquires how regulatory tools stemming from international law, public law, and private law may or may not be used for transnational corporate accountability purposes. Attention is devoted to applicable standards of liability, institutional and jurisdictional issues, and practical challenges, with a focus on ways to improve the existing legal status quo. In addition, there is consideration of the extent to which non-legal regulatory instruments may complement or provide more viable alternatives to these legal mechanisms. The book combines legal-doctrinal approaches with comparative, interdisciplinary, and policy insights with the dual aim of furthering the legal scholarly debate on these issues and enabling higher quality decision-making by policymakers seeking to implement regulatory measures that enhance corporate accountability in this context. Through its study of contemporary developments in legislation and case law, it provides a timely and important contribution to the scholarly and sociopolitical debate in the fast-evolving field of international corporate social responsibility and accountability.

Net Positive Oct 25 2020 A Financial Times Best Business Book of the Year Named one of 10 Best New Management Books for 2022 by Thinkers50 "An advocate of sustainable capitalism explains how it's done" — The Economist "Polman's new book with the sustainable business expert Andrew Winston...argues that it's profitable to do business with the goal of making the world better." — The New York Times Named as recommended reading by Fortune's CEO Daily "...Polman has been one of the most significant chief executives of his era and that his approach to business and its role in society has been both valuable and path-breaking." — Financial Times The ex-Unilever CEO who increased his shareholders' returns by 300% while ensuring the company ranked #1 in the world for sustainability for eleven years running has, for the first time, revealed how to do it. Teaming up with Andrew Winston, one of the world's most authoritative voices on corporate sustainability, Paul Polman shows business leaders how to take on humanity's greatest and most urgent challenges—climate change and inequality—and build a thriving business as a result. In this candid and straight-talking handbook, Polman and Winston reveal the secrets of Unilever's success and pull back the curtain on some of the world's most powerful c-suites. Net Positive boldly argues that the companies of the future will profit by fixing the world's problems, not creating them. Together the authors explode our most prevalent corporate myths: from the idea that business' only function is to maximise profits, to the naïve hope that Corporate Social Responsibility will save our species from disaster. These approaches, they argue, are destined for the graveyard. Instead, they show corporate leaders how to make their companies "Net Positive"—thriving by giving back more to the world than they take. Net Positive companies unleash innovation, build trust, attract the best people, thrill customers, and secure lasting success, all by helping create stronger, more inclusive societies and a healthier planet. Heal the world first, they argue, and you'll satisfy your investors as a result. With ambitious vision and compelling stories, Net Positive will teach you how to find the inner purpose and courage you need to embrace the only business model that will matter in the years ahead. You will learn how to lead others and unlock your company's soul, while setting and delivering big and aggressive goals, and taking responsibility for all of your company's impacts. You'll find out the secrets to partnering with others, including your competition and critics, to drive transformative change from which you will prosper. You'll build a company that serves your people, your customers, your communities, your shareholders—and your children and grandchildren will thank you for it. Is this win-win for business and humanity too good to be true? Don't believe it. The world's smartest CEOs are already taking their companies on the Net Positive journey and benefitting as a result.
