**The Tetris Effect** Oct 19 2022 21 February 1989. Three men fly into Moscow, representing software giants from Britain, America, and Japan. Each of them is determined to undercut the others in order to secure a technology so powerfully addictive it has brought the government department that created it to a standstill. In a country on the brink of seismic change, where spycraft is about to give way to cut-throat capitalism, Tetris has become the grand prize. Featuring corporate espionage, unmarked government organizations, courtroom drama and international conspiracies, the origin of the world's most popular video game is a gripping, fast-paced thriller of the highest order. Not only this, but it is also the tale of a one-in-a-million software start-up – a unique example of an idea, a product, and an era coming together at exactly the right moment. Tetris was perfectly (if accidentally) crafted to hit primal triggers in our minds and in Ackerman's hands its story is unputdownable.

**Warm Beer, Lousy Food** Apr 13 2022 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

*Radar Instruction Manual* Jan 22 2023 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

**Career Planning and Succession Management** Aug 17 2022 Many organizations are scrambling to prepare for an expected wave of retirements. Almost twice as many job openings are occurring from people retiring as from economic expansion--a direct function of a steadily aging workforce. The implications for businesses, government agencies, nonprofits, and educational institutions are enormous, as organizational leaders maneuver to fill the talent pipeline. In this context, organizations are stepping up their investments in career planning (training and development programs to help employees hone their skills and qualify for advancement) and succession management (programs designed to ensure the continuity of leadership). To date, however, these programs have generally been treated in isolation. Drawing from a survey of 1,000 human resource practitioners and a wide variety of case examples, the authors demonstrate how to create that crucial link between succession and career development programs--developing one's organization's talent from the bottom up and the top down simultaneously. Featuring numerous diagnostics, checklists, and other interactive elements, Career Planning and Succession Management will become an indispensable guide for leaders and human resource professionals looking to align individual and organizational goals and ensure their economic future. Many organizations today are scrambling to prepare for an expected wave of retirements. Almost twice as many job openings are occurring from people retiring than from economic expansion--a direct function of a steadily aging workforce. The implications for businesses, government agencies, nonprofits, and educational institutions are enormous, as organizational leaders maneuver to fill the talent pipeline. In this context, organizations are stepping up their investments in career planning (training and development programs to help employees hone their skills and qualify for advancement) and succession management (programs designed to ensure the continuity of leadership). To date, these programs have generally been treated in isolation, and the combined effects of attracting, developing, and grooming talent from the bottom up and the top down are being lost. Drawing from the authors' decades of research and practical experience, a survey of 1,000 human resource practitioners, and examples from a wide variety of organizations, Career Planning and Succession Management shows readers how to create that crucial link between succession and career development programs. Showcasing the most current theory and practice, the book address such hot-button issues as: how to prevent top performers from leaving, how to balance the competing needs of promoting from within versus bringing in new blood, and dealing with unexpected retirements in an age of corporate scandal. Featuring numerous diagnostics, checklists, and other interactive elements, Career Planning and Succession Management will become an indispensable guide for leaders and human resource professionals looking to align individual and organizational goals and ensure their economic future.

*Rethinking Civilizational Analysis Dec 29 2020* 'At last, a volume on civilization that truly reflects the complexity of multiple civilizations. The wealth of contributions Arjomand and Tiryakian have assembled demonstrates the value of an old concept for understanding the awful dilemmas confronting human kind in the global age. Its thoroughgoing renewal here establishes this book as the essential benchmark for future scholars of civilization' - Martin Albrow, Founding Editor of International Sociology and author of The Global Age - winner of the European Amalfi Prize, 1997 'In our tension filled world, many are heralding, and others fearing, a "clash of civilizations." The contributors to this volume provides a healthy and persuasive argument about why this clash need not, and certainly should not, take place. They do so, moreover, not by rejecting the concept of civilization, but by developing a less primordial, homogenous, and essentialist concept of it. An important collection that provides illumination in this sometimes frighteningly dark time' - Jeffrey Alexander, Professor and Chair of Sociology at Yale University 'The concept of civilization may well replace the notions of globalization and identity as the core component in the vocabulary of 21st century sociology. The authors contribute a great deal to the clarification of fashionable controversies around the "clash of civilizations" and "multiculturalism". They go a long way toward purging the concept of civilization of its ideological overtones, and they succeed admirably in turning it into powerful analytic tool of an emerging field of macrosociology, known already as civilizational analysis' - Piotr Sztompka, President, International Sociological Association Although the concept of 'civilization' has deep roots in the social sciences, there is an urgent need to re-think it for contemporary times. This book points to an exhaustion in using 'the nation state' and 'world system' as the basic macro-units of social analysis because they do not get to grips with the 'soft power' variable of cultural factors involved in global aspects of development. Also, globalization requires us to reconsider the link between civilization and a fixed or given territory. This book focuses upon the dynamic aspect of civilizations. Among the topics covered are: · Civilizational analysis and social theory · Global civilization and local cultures · Civilizational forms · Rationalization and Civilization · Civilizations as zones of prestige · Historical and comparative dimensions of civilization · The clash of civilizations.
