An Essay on Economic Reforms and Social Change in China Jul 01 2021 Abstract: The author applies a systems-oriented "holistic" approach to China's radical economic reforms during the past quarter of a century. He characterizes China's economic reforms in terms of a multidimensional classification of economic systems. When looking at the economic consequences of China's change of economic system, he deals with both the impressive growth performance and its economic costs. The author also studies the consequences of the economic reforms for the previous social arrangements in the country, which were tied to individual work units-agriculture communes, collective firms, and state-owned enterprises. He continues with the social development during the reform period, reflecting a complex mix of social advances, mainly in terms of poverty reduction, and regresses for large population groups in terms of income security and human services, such as education and, in particular, health care. Next, the author discusses China's future policy options in the social field, whereby he draws heavily on relevant experiences in industrial countries over the years. The future options are classified into three broad categories: policies influencing the level and distribution of factor income, income transfers including social insurance, and the provision of human services.

Books in the Digital Age Feb 14 2020 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive 'logic' or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had, and continues to have, a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers, and to anyone interested in books and their future.

Black Paper Nov 12 2019 A profound book of essays from a celebrated master of the form. "Darkness is not empty," writes Teju Cole in *Black Paper*, a book that meditates on what it means to sustain our humanity—and witness the humanity of others—in a time of darkness. One of the most celebrated essayists of his generation, Cole here plays variations on the essay form, modeling ways to attend to experience—not just to take in but to think critically about what we sense and what we don't. Wide-ranging but thematically unified, the essays address ethical questions about what it means to be human and what it means to bear witness, recognizing how our individual present is informed by a collective past. Cole's writings in *Black Paper* approach the fractured moment of our history through a constellation of interrelated concerns: confrontation with unsettling art, elegies both public and private, the defense of writing in a time of political upheaval, the role of the color black in the visual arts, the use of shadow in photography, and the links between literature and activism. Throughout, Cole gives us intriguing new ways of thinking about blackness and its numerous connotations. As he describes the carbon-copy process in his epilogue: "Writing on the top white sheet would transfer the carbon from the black paper onto the bottom white sheet. Black transported the meaning."
