Talking about space in literature and linguistics is a major challenge, not only for experts in the field of the humanities, but also for the broader public, searching for orientation clues on the vast book market. This volume offers a selection of studies which, even though reliant on shared instruments, apply these to different geographical spaces, uniting along an imaginary axis the East and the West, advancing challenging,

serious and innovative analyses of prose, dramatic and film texts, belonging to literatures from various countries, but also references to the phenomenon of migration seen through the lens of spatial correspondence or the existence of a “third space” dimension in the field of teaching foreign languages. The journey the impassioned reader will undertake through this volume will undoubtedly offer both the pleasure of reading itself, and incursions into complementary cultures, an endeavour completed by the unique mechanism of a spatiality which produces knowledge. Any reading engaged in through the lens of space implicitly becomes a

form of owning and assuming the latter. Apărut în perioada interbelică, în anul 1938, romanul Enigma Otiliei prezintă câteva aspecte ale burgheziei bucureștene de la începutul secolului XX prin relatarea formării unui tânăr, Felix, care înainte de a-și face o carieră, trăiește experiența primei iubiri cât și cea a relațiilor de familie. BA, CA LAUREAT al premiului maturității, ai toate șansele! Continuing the work undertaken in Vol. 1 of the History of the Literary Cultures of East-Central Europe, Vol. 2 considers various topographic sites--multicultural cities, border areas, cross-cultural corridors, multiethnic regions--that cut across national boundaries, rendering them permeable to the flow of hybrid cultural messages. By focusing on the literary cultures of specific geographical locations, this volume intends to put into

practice a new type of comparative study. Traditional comparative literary studies establish transnational comparisons and contrasts, but thereby reconfirm, however. Includes entries for maps and atlases.
