**Psychology and the Other** Nov 17 2019 "Through constructive critical exchange, Psychology and the Other engages perspectives on the Other from various subdisciplines within psychology and related disciplines. The volume uses the language of the Other as a vehicle for rethinking aspects of psychological processes, especially within the therapeutic context. As a group, the contributors demonstrate that the language of the Other may be more fitting than the egocentric

language frequently employed in psychology. They also embrace the challenge to create new theories and practices that are more ethically attuned to the dynamic realities of psychological functioning"--

[Home Maths Extension book](#) Jun 05 2021 Activities include short questions test the quick recall of number facts; puzzles and word problems reinforce important mathematical vocabulary; and longer activities practise key skills and concepts. Plus support to help teachers to target those areas requiring more practice.

[Mathematics in ILEA Primary Schools](#) Oct 17 2019

**Talking Points in Mathematics** Apr 22 2020 Talking Points in Mathematics, a resource book for teachers of primary and lower secondary school students, is an exciting collection of ideas to encourage children to think and talk about mathematics. This vital part of mathematics teaching, often neglected, is explored here with suggestions ranging from the imaginative--could an elephant walk through the door of the classroom?--to the practical--estimate the school's floor area. Starting with strategies for planning this work, the book then goes on to give ideas for extending and evaluating discussions. One section describes talking points in full with suggested questions, lists of vocabulary to introduce, aims, and follow-up. The other sections contain many more ideas described in brief, and arranged in order of difficulty.

**Mathematics in Primary Schools** Mar 22 2020

**Children and Mathematics** Nov 29 2020
