In this book the current knowledge on human cytomegalovirus (HCMV) as a human pathogen is lucidly summarized, bringing the reader fully up to date with current knowledge concerning HCMV and all the known clinical and medical aspects of diseases caused by, and associated with, HCMV. The book is divided into four parts: (I) Human cytomegalovirus and human diseases; (II) human cytomegalovirus infections and the immunocompromised host; (III) diagnosis, treatment, and prevention of human cytomegalovirus and human diseases; and (IV) molecular aspects of human cytomegalovirus. Each part is put together from chapters written by experts in the respective fields, providing basic medical and molecular knowledge in addition to more specific understanding of HCMV infections. Fruit and vegetables are both major food products in their own right and key ingredients in many processed foods. There has been growing research on their importance to health and techniques to preserve the nutritional and sensory qualities desired by consumers. This major collection summarises some of the key themes in this recent research. Part one looks at fruit, vegetables and health. There are chapters on the health benefits of increased fruit and vegetable consumption, antioxidants and improving the nutritional quality of processed fruits. Part two considers ways of managing safety and quality through the supply chain. A number of chapters discuss the production of fresh fruit and vegetables looking at modelling, the use of HACCP systems and ways of maintaining postharvest quality. There are also two chapters on instrumentation for measuring quality. Two final chapters look at maintaining the safety and quality of processed fruit and vegetables.

three reviews technologies to improve fruit and vegetable products. Two chapters cover how to extend the shelf-life of fruits and vegetables during cultivation. The following two chapters then consider how postharvest handling can improve quality, covering minimal processing, new modified atmosphere packaging techniques and the use of edible coatings. Two final chapters discuss two major recent technologies in processing fruit and vegetables: high pressure processing and the use of vacuum technology. With its distinguished editor and international team of contributors, *Fruit and vegetable processing* provides an authoritative review of key research on measuring and improving the quality of both fresh and processed fruits and vegetables. Reviews recent research on improving the sensory, nutritional and functional qualities of fruit and vegetables, whether as fresh or processed products Examines the importance of fruits and vegetables in processed foods and outlines techniques to preserve the nutritional and sensory qualities desired by consumers Discusses two major technologies in processing fruits and vegetables: high pressure processing and the use of vacuum technology This comprehensive reference provides veterinarians with everything they need to know about performing surgeries such as spaying and neutering in busy animal shelters.
